وزارة التربية والتعليم		اختبار الشهادة الثانوية العامة ( القسم العلمي ) للعام الدراسي 2021-2022م
قطاع المناهج والتوجيه	المادة	اللغة الانجليزية
Part One: Mark (T/True) for the true statements and ( F/False ) for the false ones. (1) point each. 1		
Litmus paper is red in color.	1	
A valley is found between two hills.	2	
If the weather is misty, we can see clearly.	3	
Banana has a curved shape.	4	
A tractor is a machine used by a farmer.	5	
"Watch carefully" means "observe".	6	
Quantum theory states that light acts like waves.	7	
People are able to hear ultrasonic sound.	8	
During an earthquake the ground moves and shakes.	9	
"To watch carefully" means "to observe".	10	
Painkiller is used to get rid of headaches.	11	
AIDS is disease that was easily cured.	12	
Smallpox is a disease that is only found in cattle.	13	
"Annum" means "yearly".	14	
The strength of the earthquake is measured on the microscope.	15	
A prefix is a group of letters that added to the end of the stem.	16	
Things you use in cooking are ingredients.	17	
A flow chart is a simple way of showing information.	18	
When the moon is close to the earth, it looks smaller.	19	
The cabin is a small house in which you live.	20	

Part two: A) Read the following passage then choose the best answer to the questions below: (2) points each. 2

**Gravity** is the attraction between two objects. Every object on Earth is attracted toward the center of Earth. Gravity is what keeps us on the ground. Without **it**, we would **drift** into space. The force between Earth and you is greater than the force between the moon and you. You would weigh less on the moon, because the moon has less mass than Earth has. The moon is attracted toward Earth. The force that exists between Earth and the moon is gravitational attraction. This force keeps the moon orbiting Earth. The moon revolves around Earth. Isaac Newton was the first person to explain the effect of gravity upon our universe. He used mathematical formula to prove that gravity is what keeps the planets in orbit. Since Newton's discoveries, we have learned a great deal about the effects of gravity. We know that, because of gravity, the moon orbits Earth. And also because of gravity, Earth revolves around the sun. gravity affects all the planets in the solar system as well as the sun.

The text is mainly talking about?								21
the sun revolving	4	the moon orbit	3	gravity	2	earth's movement	1	
The force between you and Earth is ..... than the force between the moon and you.								22
less	4	greater	3	smaller	2	stronger	1	
To prove that gravity keeps the planets in orbit, Newton used..... formula								23
geographical	4	mathematical	3	chemical	2	physical	1	
Gravitational attraction keeps the moon orbiting .....								24
the sun	4	the stars	3	the moon	2	Earth	1	
What did Isaac Newton explained? The .....								25
gravity effect	4	sun revolving	3	moon orbit	2	planets	1	
The Earth revolves around.....								26
the clouds	4	the stars	3	the sun	2	the moon	1	
..... revolves around Earth.								27
sky	4	the stars	3	the moon	2	the sun	1	
" Gravity" means attraction between ..... objects								28
two	4	five	3	three	2	four	1	
"drift" means .....								29
move	4	take	3	change	2	rotate	1	
" it" refers back to .....								30
the sun	4	the moon	3	earth	2	gravity	1

قطاع المناهج والتوجيه	المادة	اللغة الانجليزية
Part One: Mark (T/True) for the true statements and ( F/False ) for the false ones. (1) point each.1		
The kinetic theory states that particles are always moving.	1	
Bases that dissolve in water are called alkalis.	2	
A stream is bigger than a river.	3	
Round, square and triangle are all shapes.	4	
Chickens scratch with their claws.	5	
The word " grazing" means " eating grass"	6	
A concave lens makes objects look larger.	7	
Prism is an example of refraction.	8	
It is easy to control a forest fire.	9	
"Diligent" means "lazy" .	10	
A nightmare is often pleasant .	11	
"Vaccination" means" giving disease to prevent disease".	12	
Smallpox is a disease that is only found in cattle.	13	
The strength of the earthquake is measured on the Richter scale.	14	
A person who applies for a job is an applicant.	15	
A group of letters that added to the end of the stem is a suffix.	16	
Things you use in cooking are ingredients.	17	
Brine is a kind of sweetened water.	18	
The moon disappears in lunar eclipse.	19	
The front part of the ship is called a mast.	20	

Part two: A) Read the following passage then choose the best answer to the questions below: (2) points each.2

In many ways, travelling is much easier and faster than it was in the **past**. But travelling fast doesn't always mean travelling in comfort. For many people, long plane flights are unpleasant. For some people, flying can even be dangerous because **passengers** in plane have to sit still. In fact, doctors say that sitting for a long time is not good for you when you sit still for many hours, your blood doesn't flow well, especially in your legs. When the blood stops flowing well, you may get a blood clot in your legs. This can be painful. It can also have more serious effects on your health. If the blood clot breaks up, the small clots can then travel to another parts of the body. If they get into the lungs, the heart, or the brain, there is risk of death. To prevent that you should try to keep your blood flowing well during a long flight, you can get up now and then and walk down the aisle. Many airline companies now show videos that explain how to do these exercises. They are just simple movements of the arms, legs and head, but **they** help the blood flows better.

The text is mainly talking about .....						21
airport	4	transport	3	airplanes	2	
For many people, long plane flights are .....						22
joyful	4	interesting	3	unpleasant	2

Part One: Mark (T/True) for the true statements and ( F/False ) for the false ones. (1) point each.1		
"Alkali" means "the ashes of plants".	1	
Liquids have unfixed shape.	2	
A mule is a cross between a lion and a tiger.	3	
Round, square , straight and curved are coverings .	4	
Wolf and jackal are members of the cat- family.	5	
A farmer uses generator to turn the soil over.	6	
"Ultrasonic sound" means "beyond sound".	7	
Curst is the hard rock surface of the earth.	8	
During a hurricane the wind flattens everything.	9	
The synonym of career is job.	10	
"Awful" means "very good".	11	
A weak form of the disease leads to immunity.	12	
Smallpox is a disease that is only found in cattle.	13	
The design of a text means a layout.	14	
A person who applies for a job is an applicant.	15	
A prefix is a group of letters that goes in front of the stem.	16	
Things you use in cooking are ingredients.	17	
You have to squeeze lemon before you drink it.	18	
When the moon is close to the earth, it looks smaller.	19	
The front part of the ship is called a mast.	20	
Part two: A) Read the following passage then choose the best answer to the questions below: (2) points each.2		

The Italian Scientist Galileo Galilei was born in 1564 near Pisa, Italy. He began to study medicine at the University of Pisa. He was a natural philosopher, astronomer and mathematician who made fundamental contributions to the sciences of motion and astronomy. One of Galileo's most important discoveries was gravity, the force that makes things fall down. Before Galileo, there were no scientific studies of gravity. People believed that heavy objects fell faster than light objects. Galileo showed that this is not true. In his most famous experiment, he used two metal balls of different masses and dropped them from the Leaning Tower of Pisa at the same time so that they rolled down the tower. The **heavy** ball didn't roll faster than the **light** one. In this experiment, Galileo discovered the law of falling objects which is an important law of physics. In 1609, Galileo made his first telescope modeled after telescopes produced in other parts of Europe that could **magnify** objects three times. He later created a telescope that same year **which** could magnify objects twenty times. Galileo died in 1642.

The moon disappears in lunar eclipse.	19	
The deck is the top level of the ship.	20	
Part two: A) Read the following passage then choose the best answer to the questions below: (2) points each.2		

**Gravity** is the attraction between two objects. Every object on Earth is attracted toward the center of Earth. Gravity is what keeps us on the ground. Without **it**, we would **drift** into space. The force between Earth and you is greater than the force between the moon and you. You would weigh less on the moon, because the moon has less mass than Earth has. The moon is attracted toward Earth. The force that exists between Earth and the moon is gravitational attraction. This force keeps the moon orbiting Earth. The moon revolves around Earth. Isaac Newton was the first person to explain the effect of gravity upon our universe. He used mathematical formula to prove that gravity is what keeps the planets in orbit. Since Newton's discoveries, we have learned a great deal about the effects of gravity. We know that, because of gravity, the moon orbits Earth. And also because of gravity, Earth revolves around the sun. gravity affects all the planets in the solar system as well as the sun.

The text is mainly talking about?								21
the sun revolving	4	the moon orbit	3	gravity	2	earth's movement	1	
Gravitational attraction keeps the moon orbiting .....								22
